OBJECTIVE

To obtain a degree in Computer Science and find an internship that would help me further my professional knowledge and skills about databases, software developments, networks, and network security.

SKILLS & ABILITIES

- Programming Languages: JAVA, JavaScript, C++, Python, HTML5, CSS3
- Operating systems: Windows, macOS, Linux
- Applications and database systems: Android Studio, Jenkins
- Knowledge of Networks, Oracle, JetBrains, Web Development, and Computer Hardware

EXPERIENCE

BidPal, Inc.

May 2017 - Present

- Working as a Software Engineer in Test
- I started back up their automation framework. I would write test scripts in Java utilizing selenium web driver and Sauce Labs against their product to check for any bugs or problems.

Lippert Components, Goshen, IN

May 2014 - August 2014

- Worked as an Inventory Control Analyst
- Every day I would go out onto their 40 million dollars' worth of inventory and make sure their physical inventory lines up with their database.
- I would constantly be on the database updating it or changing logs

LEADERSHIP

Goshen High School Football Team Captain

2014

- Team captain of my high school's varsity football team my senior year.
- Went on to radio talk shows with the local sports channel
- Was awarded the Beats Hoke award, which is an award given to a player with excellence in teamwork

EDUCATION

Ball State University, Muncie, IN, Computer Science

2014 - 2018

I have taken classes in Network Security, Operating Systems, Advanced Programming, Calculus 1 & 2, Trigonometry, Algorithms, Python, Theory of Computation, Computers in Society, Discrete Structure, Basics of Computers, Building a Network, and many more core curriculum classes. GPA: 3.2
